DYE INSTRUCTIONS

FOR BEST RESULTS

1. Always do a preliminary patch and strand test. If this is the first time you are colouring your hair, we recommend you read the extensive Hair Dye FAQ available on our website!
2. Pre-lighten your hair using our GHOSTED Hair Lightening Kit. Please note that to achieve the vivid colours shown, you will need to pre-lighten your hair to a very light blonde colour (the lighter, the better). If you do not pre-lighten, the colour achieved will depend upon your natural hair colour (the lighter your hair, the stronger the results).
3. Wash your hair with the Holyplex N°1 Purify cleansing shampoo. Do not use conditioner.
4. Towel dry your hair.
5. Apply Vaseline or similar around your hairline to prevent staining.
6. Apply **DYE WITH ATTITUDE** hair colour evenly beginning at the roots and working through to the ends using gloves and a hair dye brush.
7. Allow to absorb for a minimum of 30 - 60 minutes before rinsing out thoroughly with cold/ lukewarm water until the water runs clear. The colour will fade with each wash, we recommend you wash with cool water to maintain colour. For best results use the Holyplex Hair Care Range to keep your hair in the best condition.

Warning: may stain clothing/materials.

ATTITUDE GHOSTED

HAIR LIGHTENING KIT

The GHOSTED Hair Lightening Kit is the perfect way to prepare your hair before adding *DYE WITH ATTITUDE* semi-permanent hair colour.

Our colours perform best when applied to pre-lightened hair, so our GHOSTED Bleach Powder has you covered. Ready to be mixed with our GHOSTED Peroxide Activator, available in 20, 30 and 40 Volume, for best results!

20 VOLUME KIT
SKU: 666028044

30 VOLUME KIT
SKU: 666028030

40 VOLUME KIT
SKU: 666028031

NOTE: Each kit includes bleach powder, peroxide activator, brush and gloves.

BLEACH INSTRUCTIONS

We always recommend you do a strand test first (details on our website).

PREPARATION

Wear protective gloves. Pointing the products away from the face, avoiding inhalation, empty the Ghosted Bleach Powder sachet into a non-metallic bowl. Add the Ghosted Peroxide Activator and stir until you have a smooth, creamy mixture. Apply mixture immediately, do not wait a long time.

APPLICATION

Ensure your hair is dry and tangle-free (never wash hair prior to bleaching, the oils on the scalp help protect the skin). Protect the hairline and ears with Vaseline before lightening. Use the brush and/or gloved fingers to apply evenly to saturate the hair working towards the roots and avoiding the scalp where possible.

DEVELOPMENT TIME

The strand test gives an indication, but you must check regularly by using a damp paper towel to remove the mixture from a small strand. Check every 5 - 10 minutes to avoid over-processing which can lead to breakage.

Hair colour development time (this is a guideline)

Light, medium, dark blonde	15-30 minutes
Brown hair, dark brown	30-45 minutes max

RINSING

Once the desired shade is reached, use lukewarm water and shampoo and rinse thoroughly away from the eyes. Do not blow dry if possible, or use any heating tools or styling products for a few days after bleaching. DYE WITH ATTITUDE semi-permanent hair colours have a conditioning effect and can now be used to create the colours of your dreams!
